

Aspera était présent au NAB 2015 stand SL9110, l'éditeur de logiciels de distribution de fichiers Audio, Vidéo a présenté ses innovations, ses nombreuses mises à jour et son nouveau logiciel : **"Aspera Files"**. Pour rappel, CTM Solutions distribue les Solutions Aspera en France :

Welcome to the NAB2015 special edition of Aspera FASP® Times. This year we are especially excited to introduce two new upcoming SaaS offerings and major enhancements to the core FASP Transfer Platform, Sharing and Collaboration solutions and our SDKs. Join us at Booth SL9110 to see demos and learn how our high-speed file transfer and automation solutions power today's digital media workflows across enterprise data centers and the cloud.

Also in our booth you'll have the opportunity to explore our partner showcase, featuring joint solutions that combine Aspera's high-speed transfer technology with the leading media technologies of today.

New Aspera :

New this year, we will be introducing Aspera Files, a breakthrough SaaS Platform that allows any media organization – small to large – to establish a branded web-based presence for the fast, easy and secure delivery and exchange of file based media between end users across different organizations. Content can be stored and accessed in multiple cloud and on premise storage systems, and sharing is as easy as drag-and-drop regardless of where the content is located.
