CatDV 11

Nouvelle version 11 de CatDV avec comme principale nouveauté : un nouveau moteur de lecture des fichiers vidéo qui permet de lire nativement les fichiers RED Epic et les fichiers AVCHD. Passage en 64 bits pour plus de performances au niveau du traitement des fichiers grâce à une plus grande gestion de la capacité mémoire :

L'option MXF est également étendue pour supporter les informations RED meta-clip. Autre nouveauté : l'ajout d'un outil de gestion de couleur intelligent en vue d'indexer les médias pour permettre une recherche encore plus efficace des médias.

The screenshot displays the CatDV Web Client interface. At the top, the browser address bar shows 'http://localhost:8080/catdv_test/WebClient.html'. The interface includes a navigation menu on the left with 'CATALOGS' and 'SMART FOLDERS'. The central area features a video player showing a scene of a city square. Below the player is a table of video clips with columns for Timecode, Duration, Name, and Category. The table contains several entries, with 'Siena_16_9' highlighted in blue.

Timecode	Duration	Name	Category
0:31:50:14	0:00:06:02	Market square	Range
0:31:58:10		Roof tops	Marker
0:32:13:00	0:00:03:15	Bell tower	Range

Name	Category	Timecode	Duration	Format
10 frame jones.mov		0:00:00:00	0:00:00:10	DV Movie (NTSC 4:3, 32 kHz lock)
Test case 03.mov	Untitled	0:15:38:08	0:15:47:16	DV Movie (PAL 4:3, 48 kHz)
Siena_16_9	Tape 28	0:31:45:07	0:32:16:15	DV Movie (PAL 16:9, 48 kHz)
realityclose.dv		0:06:42:19	0:07:09:16	DV Stream (PAL 4:3, 32 kHz)
Victoria SecretHQ.mov		0:00:00:00	0:01:53:05	QT Movie (Apple ProRes 422)
Clip1240		1:01:56:20	1:02:30:09	MXF Metaclip Movie (H.264/MPEG)

New versions available and shipping now ...

SquareBox a annoncé au NAB la version 11 de CatDV

- catdv11Server 6.9 improved web client and cloud support which further extends CatDV deployment options including public and private cloud. New functions include the upload and download of CatDV assets (source and proxy), the creation of cut lists and sub-clips, Final Cut XML export for simple integration with major NLEs, more sophisticated meta-data search tools, and improvements to playback and marker handling.
- Pegasus 10.1 with support for 100s of shared fields between CatDV and Media Composer plus MD5 checksums and better Avid relinking.
- CatDV Worker 5.1 with bulk edit capabilities, quick ingest and analyse later, plus MD5 checksums.
- New Integrations with FileCatalyst, Sony Optical Disk Archive, Episode, Red (transcode), writing metadata to source files (all documented on the Square Box web site).
- Pricing Improvements Updates to the price list: making the full web client cheaper, an automation bundle for integrators with REST and Worker API access and a permanent reduction in Pegasus pricing.
- One Month Free Maintenance customer registration of maintenance contracts (at <http://www.squarebox.com/support/register-support-contract/>) now earn one month free of charge.
