Pyramix 9.1 / Ovation 5.1 / VCube **HotFix Released!**

The Merging Technologies Development Team is pleased to announce the HotFix release of Pyramix 9.1.6 build 25336, VCube 5.1.6 build 25336 and Ovation 5.1.6 build 25336.

The Pyramix 9.1.6 HotFix version contains the following fixes:

- MT5592: Fixed. Automation: Snapshot fade option ramping should apply to ON/OFF parameters
- MT5595: Fixed. Pyramix potential crash with VT2
- MT6020: Fixed. Talkback playback selector shows a ghost connection when changing

output patch in the configure page

- MT6167: Fixed. Switching between projects can crash Pyramix
- MT6183: Fixed. Controller: Crash in MTOASISPortEUCON.dll when controller not attached and adding Buses to the Mixer.
- MT6206: Fixed. Album Publishing is not performed with SACD Render mode
- MT6207: Fixed. RME MadiFaceXT - Pyramix not starting is set to external clock above 1 Fs
- MT6208: Fixed. Added DSD256 support for DSF output to MTDSDConverter
- MT6211: Fixed. Pyramix Tango crash when removing the VS3 Alchemist plugin
- MT6222: Fixed. Quick Import mov file with AAC audio not working
- MT6228: Fixed. Potential MTOASISTPortEUCON.dll crash when adding SubGroup
- MT6229: Fixed. Missing MS C++ 2008 SP1 pack on 32 bits installers, causing missing VS3 Solera
- MT6240: Fixed. Quicktime Handler doesnt support no seek mode
- MT6242: Fixed. Removing several VCAs in Mixer main page makes Pyramix crash
- MT6267: Fixed. Adding VS3 effects in Configure page will re-activate VS3 effects that were off.
- MT6272: Fixed. RAVENNA ASIO x86 installer missing some components (MTTool dll)
- MT6291: Fixed. Bus Dithering under 64bit causes potential glitches over 0dB
- MT6294: Fixed. DSD render crash with phase invert crash with mono media
- Fixed. Album Publishing: In some cases the summary XML was not generated in the expected folder
- Fixed. Automation mode remote control inaccuracy (plugins)
- Fixed. VST Scan random crash in Pyramix General Settings when no folder selected

Important: If using the new Cover Art Album Publishing option within a v9.1.5 or 9.1.6 project a Save Special As 9.0 should be performed in order to open that project in a v9.1.4 or v9.0.
