

Avid Video - Up-Date Info : nouvelle version Media Composer | Logiciel (**v8.2**) inclue l'option Symphony compatible avec le nouvel OS d'Apple Mac OSX Yosemite. disponible en téléchargement sur le site de Avid découvrez ces nouveautés et **pré-requis avant téléchargement**

:

Avid is pleased to announce qualification of Apple's Mac OSX Yosemite (v10.10) with Media Composer | Software (v8.2) including systems with the Symphony option.

### Software Version Requirements

Media Composer | Software v8.2

It is important to note twith dual 6 core Mac Pro towers (Westmere) and the 2013 Mac Pro with a single 12 core CPU may experience performance issues with transcode, render, and playback. These degradations are typically seen with higher resolution material. The issue has been logged with Apple and we are awaiting an update.

NOTE: Updated builds of New Blue Titler Pro v1 and v2 are required for Mac OSX 10.10 to avoid installation errors. These builds are available for download through Avid's Application Manager.

Please refer to the latest Media Composer | Software ReadMe for other requirements

### Why is this Alert Important ?

Avid has a long history of supporting Media Composer software running on Apple Mac systems. Many of our customers look forward to installing the latest Operating System released by Apple and benefitting from adding new technology to their editing workflows.

Numerous customers have made inquiries to Avid and our Partners about Media Composer qualification with Mac OSX Yosemite (v10.10). Avid's continued support of Apple's latest Operating System strengthens our commitment to our customers and to fulfilling their specific needs.
